

Dear Sirs:It is very sad that you are trying to limit XM listeners to just music.

For me, and I am sure that for many of us who travel, is very important to have information about weather and trafic, since we loose contact to any radio frequencies from cities once we leave the area.

XM is allways with us and we need to be informed at any time we desire.

And, of course we love XM!!

Thank you for understanding, and I look forward to hear the good news.

Jorge Sanchez
